PACKAID

SOLAR & GLASS

We provide specialized packaging solutions tailored to meet the unique needs of solar and glass industries, where materials are both **fragile and heavy**. Designed for **tear resistance** and ease of maintenance, they offer superior protection throughout transit.

For glass packaging, we focus on the material's sensitivity, addressing dynamic conditions with **innovative blends of corrugated materials**, PE foam, and XLPE foam. This combination provides exceptional cushioning, ensuring our unmatched record of break-free deliveries continues.

Durability:
Tear-resistant and designed to withstand the weight of heavy materials during transit.

Compliance with Standards:
Manufactured to meet international safety and quality benchmarks.

Cushioning Protection:
Advanced foam layers minimize impact, safeguarding fragile contents from breakage.

Custom Design:
Tailored to accommodate the unique dimensions and fragility of solar and glass materials.
